

# KESCH Kft. Printing Solutions

## IS THE SERVICE LATE ?

For our contracted customers, we guarantee an appearance within 4 or 8 hours!

## SUPPLY PROBLEMS?

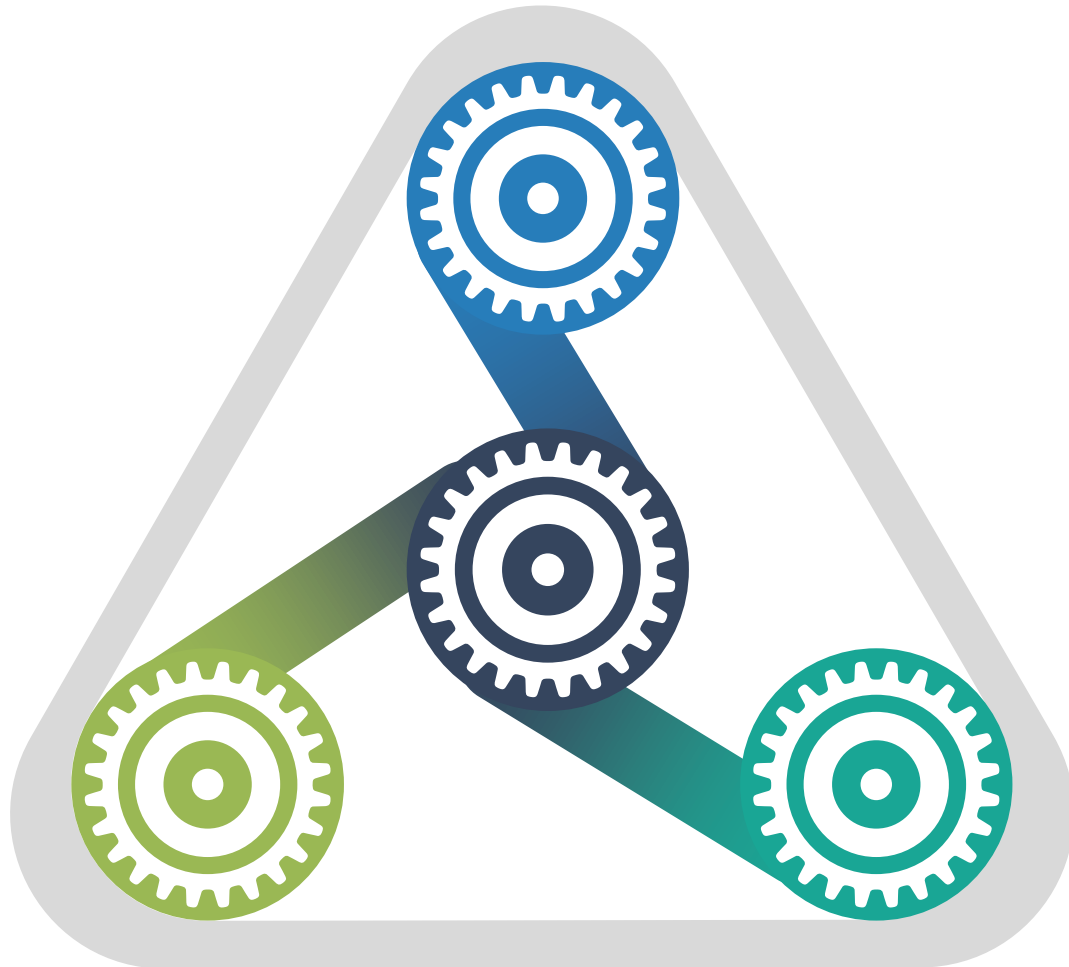

We deliver on short notice, at competitive prices, from the widest range. We adjust our offer to the needs of our customers.

## LOOKING FOR A CUSTOM SOLUTION?

We are at your disposal with unique printing and industrial solutions and developments!

# Printer operation and maintenance

## Printer operation and maintenance

### Short reaction time

The most expensive printer is a defective printer. We have a guaranteed departure time, a replacement printer and qualified technicians at the disposal of our contracted partners.

#### Industrial printers

Maintenance, repair and operation of industrial printers, laser printers, dot matrix printers. Distribution of printers and supply of supplies.

#### Office printers

As an HP Gold partner, personalized printer fleet operation, supplies, leased or even your own printer fleet.

As a Konica Minolta Selection partner, we undertake the rental and operation of multifunctional A4 color laser printers.

#### Special printing

Distribution and repair of card printers, mobile printers, supply of consumables.

# Do you have special needs?

## Unique engineering solutions!

01

### Software development

Development of industrial programming tasks, individual process control and evaluation software. Programming of special printer interface in ESC / P2, IGP, PCL, ZPL languages.

02

### Measurement systems

Our measuring devices are able to measure many physical properties on the manufactured products. From pneumatic devices to elementary electronic components, our systems are able to test many parameters. We provide instrument control, measurement data processing, logging with our PC-based software in addition to the equipment, so a robust and highly reliable system is available to the user.

03

### Manufacturing support systems

Our production support systems ensure the error-free and smooth running of the production and packaging processes. Every step of the production lifecycle can be tracked and all significant events can be logged.

04

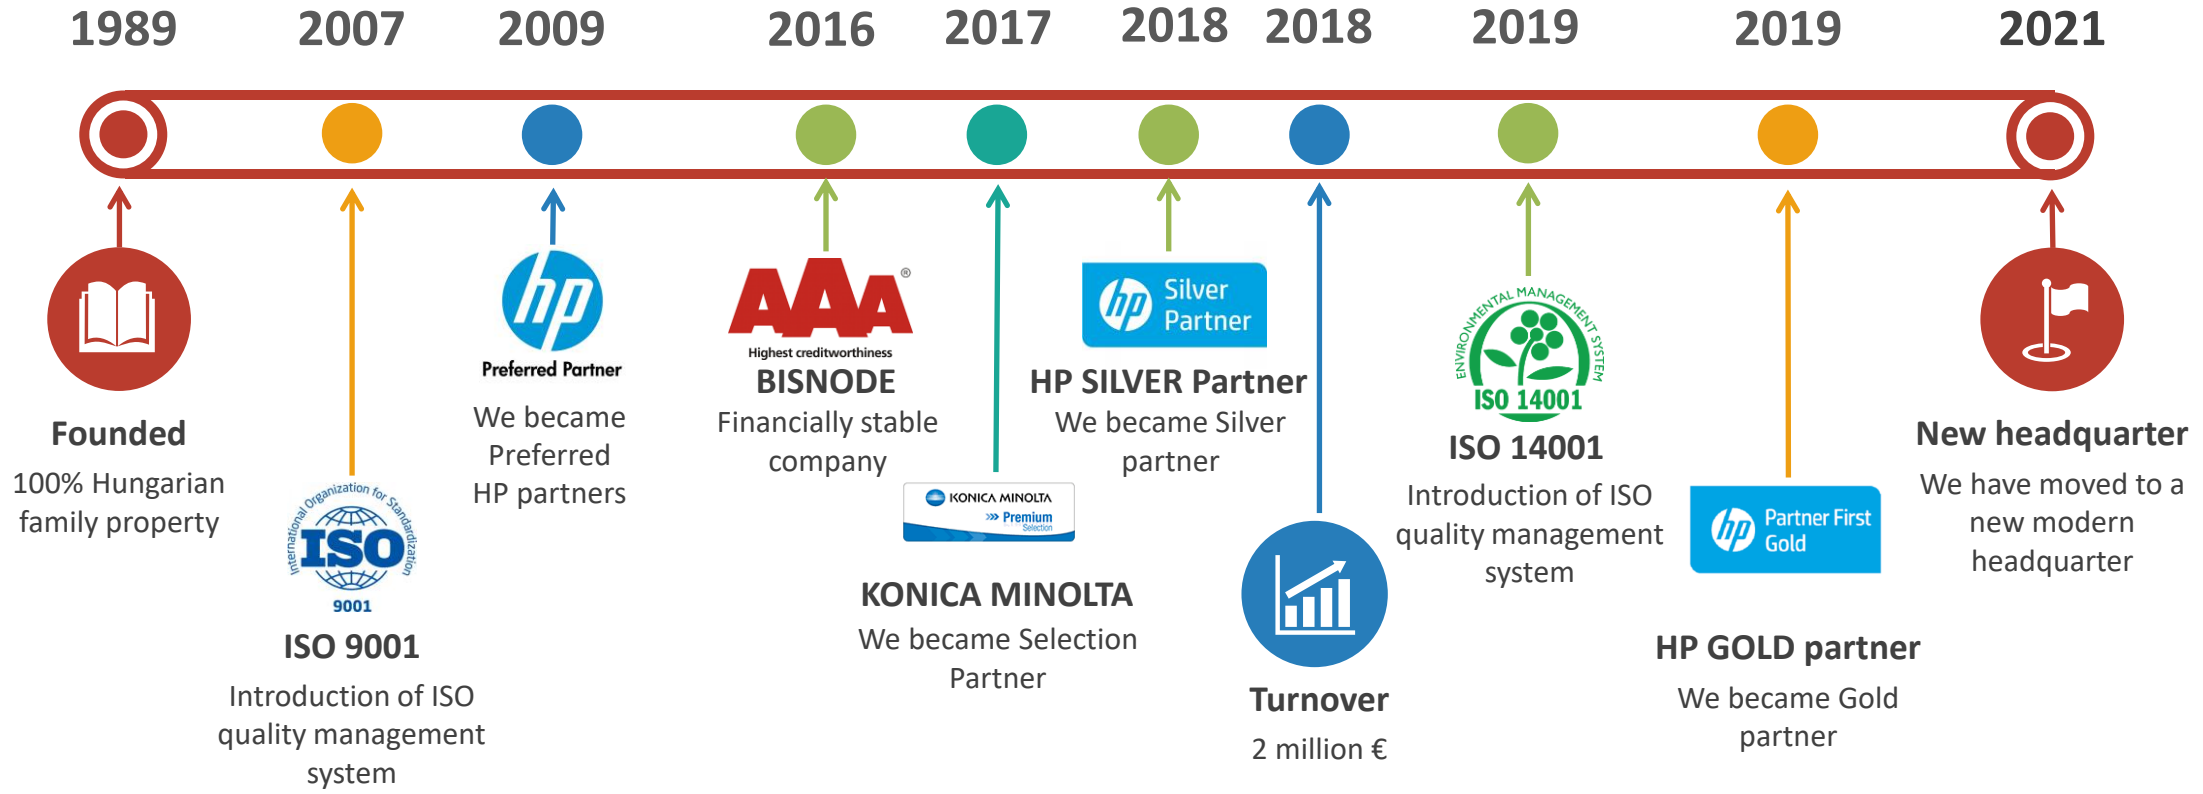

### Control Equipment - Custom Made Equipment

Individually manufactured and designed devices, from mobile workstations to industrial sensor and actuator controllers to automotive industrial test system controllers, are able to serve a wide range of any unique, special needs, and the creation of a target device fits into our profile.
